Second hand Range Servant Ball Dispenser RS-12

With Cone Top

For over 25 years the RS Golf Ball Dispenser Series has been quietly dispensing hundreds of millions of golf balls worldwide.

The original flagship product of Range Servant is the RS-Golf Ball Dispenser, which has consistently proven to be the most reliable and durable ball dispenser on the market. Using the Grid and Cradle System, introduced in 1983, it consistently delivers an exact amount of clean, counted and un-damaged balls to the customer.

RS models are available in lower capacity Flat Top format or higher capacity Cone Top format. Flat Top models are only 59" tall which allows for easy and ergonomic manual loading. Cone Top models are taller and are designed to be filled by our ball elevator or blower system. All RS dispensers are modular in design. This allows your ball dispenser to expand in size along with your business
